InterSystems Challenge Intro

InterSystems Challenge for Rakathon 2026

Innovative solutions with interoperable healthcare data

For your project, use InterSystems IRIS for Health – for demonstrating interoperability, or implementing generative AI along with vector search or an agent-based approach.

CAN BE COMBINED WITH ANY OTHER CHALLENGE

Winner prize 1500 EUR

Innovation & real-world impact: a clear healthcare problem and path to MVP

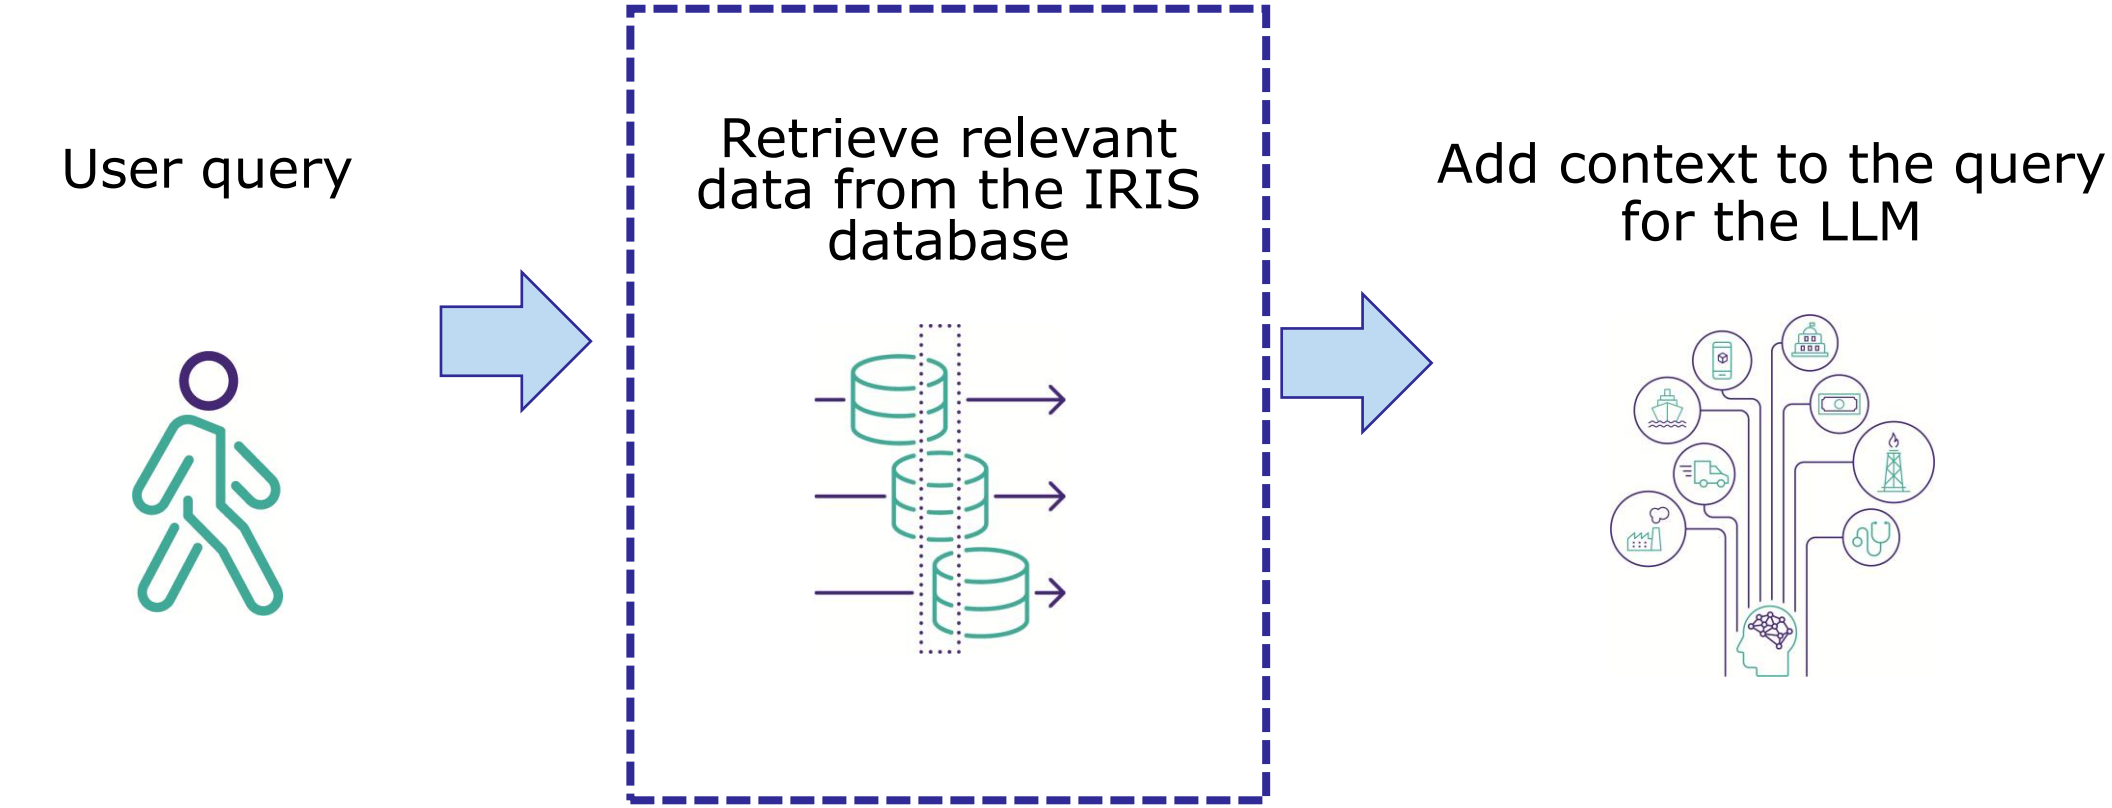

Meaningful use of InterSystems technology with AI and/or FHIR

Technical coherence: a sound data model and architecture

Full challenge description, GitHub template and tutorials:

developer.intersystems.com/intersystems-challenge-at-rakathon-2026/

Retrieval-Augmented Generation (RAG)

Use InterSystems IRIS Vector Search to narrow down contextual information

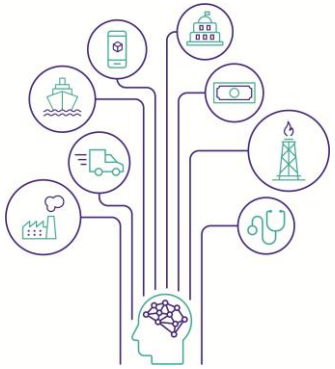

Agent-based access to data using tools

User of agent powered system

Agent (LLM)

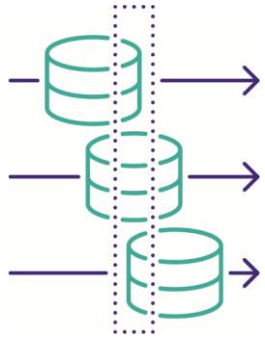

Selects a tool

Repeats based on the tool call result

Tools get data

SQL / API / FHIR / Vector Search

Leverage data in InterSystems IRIS through agent tools

FHIR Server for interoperability and/or storage layer

InterSystems IRIS FHIR server enables data exchange with other systems and can also serve as the solution's storage layer.

Access to challenge data - Ostrava

Two ways to request access to the datasets for your challenge

1. Contact an InterSystems mentor in person

Speak to a mentor and ask for access to the data for your chosen challenge.

2. Contact an InterSystems mentor on Slack

Message a mentor on Slack and specify which challenge data you need.

Data for the VZP challenges is available in Azure.

Access to challenge data - Brno

For Brno challenges, contact the **challenge owners** directly or their technical support team.

1. In person

Ask the challenge owner or their technical support team for data access.

2. On Slack

Message the challenge owner or their technical support team to request data access.

Data for the VZP challenges is available in Azure.

Access to challenge data - Prague

The contact for data access depends on your chosen challenge.

Smart Onco AA and MDT Copilot

Contact an **InterSystems mentor** in person or on Slack to request access to the challenge data.

All other challenges

Contact the **challenge authors** directly or their technical support team to request data access.

Data for the VZP challenges is available in Azure.
